CALL FOR PAPERS

Special Issue "Digital Economy"

Dear Colleagues,

Globally, digital technologies continue to drive transformative change in society and the economy. The digitalization of the economy is viewed as a catalyst for innovation, competitiveness, and growth, offering immense potential for entrepreneurs and small- and medium-sized enterprises (SMEs). The digitalization of the economy has an effect on businesses, resulting in the development of new business structures. Consequently, the design of novel business models for the digital economy is becoming a vital area of study on a global scale. This Special Issue also invites contributions that focus on the methodological aspects, offering innovative approaches to capturing digitalization of various sectors and actors within the economy.

In light of the current Economic climate, we have designated the June 2024 Issue as a Special Issue on the "Digital Economy". Therefore, all submissions to the journal should be centered around this current theme.

We welcome original and creative papers in the areas listed below, but not limited to them. The mission of the issue encompasses any new models, theories, and methods pertaining to the digital economy.

Digitalization of the Economy

Digitalization of Infrastructures of International Organisations

Digitalization of Public Administration Business Models for the Digital Economy
